www.techinvasion.com.ng

Problem Statement

Schools need accurate records and modern assessment even when connectivity is limited and administration is split across paper and spreadsheets.

Fragmented records

Disconnected tools create different versions of the same learner, class or result.

- Duplicate student data
- Conflicting class lists
- Separate attendance books
- Manual score consolidation
- Difficult staff handover
- Slow historical retrieval

Interrupted operations

Cloud-only systems can fail at the exact time a school needs them most.

- Unstable internet service
- High connectivity cost
- Slow exam response
- Unsaved candidate work
- No local fallback
- Delayed remote support

Limited control

Broad access and manual calculations weaken accountability and decision-making.

- Teachers see unrelated records
- Unclear change history
- Late leadership reports
- Inconsistent guardian updates
- Manual promotion decisions
- Hard-to-audit corrections

THE COST More administrative effort, slower reporting, avoidable errors and less confidence in the school's official record.

Solution Provided

SchoolHouse brings core school work onto one central LAN server while keeping optional remote and cloud services under administrative control.

One school record

People, classes, attendance, assessments and reports use one governed data model.

- Single student identity
- Staff linked to responsibilities
- Classes linked to teachers
- Results linked to periods
- Reports use approved records
- Branding reused consistently

Access by responsibility

The interface and every protected endpoint apply role, permission, class and course scope.

- Super Admin oversight
- Staff privilege dashboard
- Class-teacher boundaries
- Course-teacher boundaries
- Student personal scope
- Dedicated access logs

Hybrid continuity

Essential work stays available locally and connected services synchronize when conditions allow.

- LAN browser access
- Kiosk examination mode
- PostgreSQL records
- Redis answer cache
- Background cloud sync
- Email and SMS providers

RESULT A faster daily workflow, safer access, dependable CBT, consistent evaluation and a practical route from offline to hybrid operation.

Architecture for reliable school operations

The platform separates durable SQL records, real-time exam activity, user interfaces and external integrations so each can be protected and monitored.

Application services

Node.js and Express provide validated APIs while React and Vite deliver responsive role-based workspaces.

- REST module endpoints
- Socket.IO event channels
- Desktop and tablet layouts
- Mobile navigation drawer
- Central error handling
- Role-aware menus

Data and performance

Prisma manages PostgreSQL as the authoritative record; Redis absorbs frequent CBT answer saves.

- Transactional writes
- Indexed school queries
- Server-side pagination
- Five-second autosave
- Durable exam finalization
- Reduced query amplification

Deployment and sync

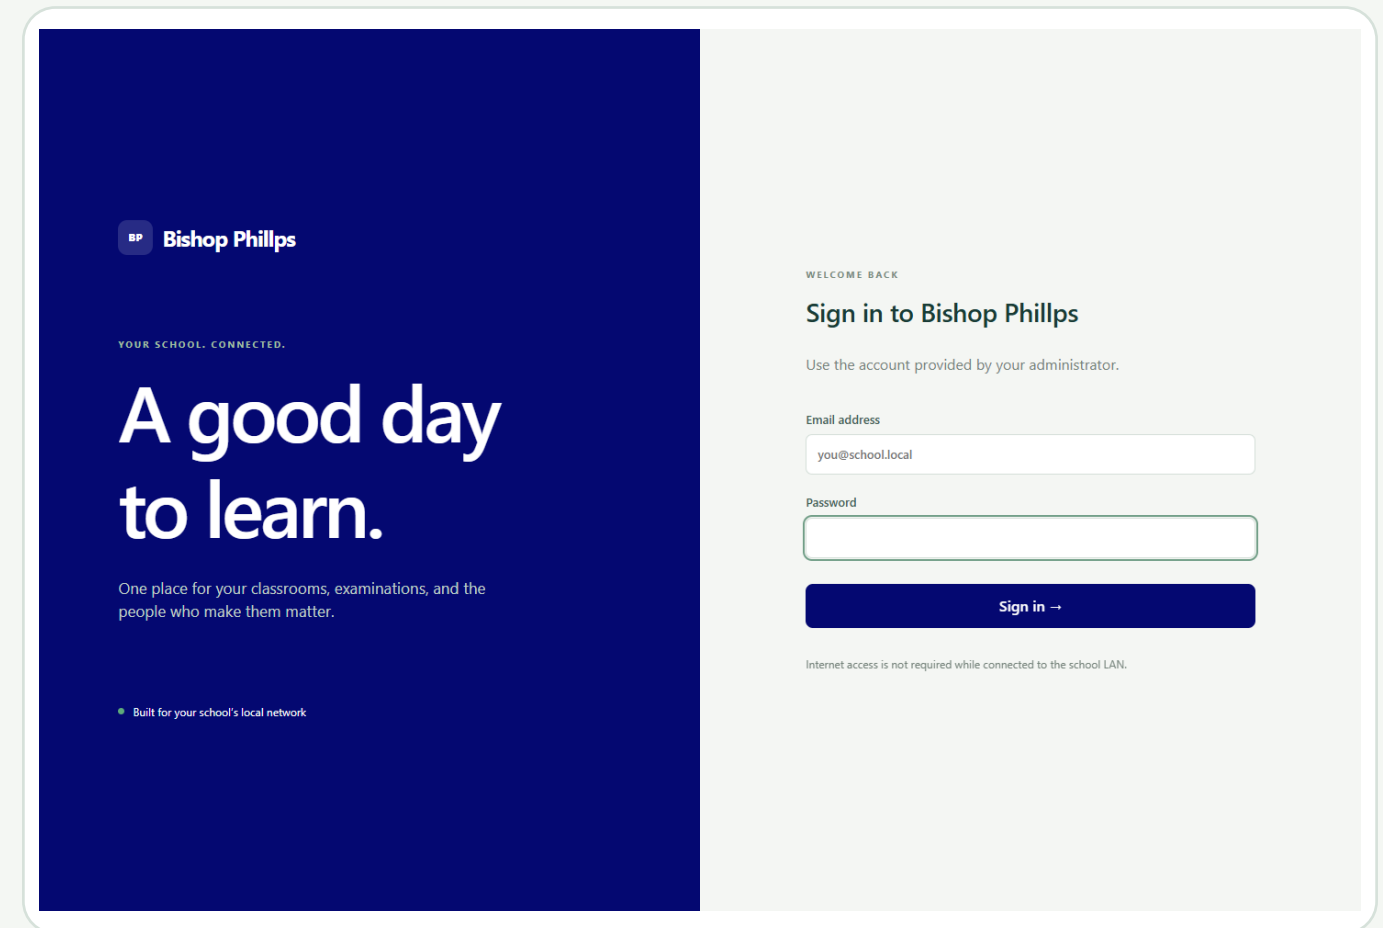

Docker Compose coordinates services and workers process approved external operations.

- Repeatable installation
- Health checks
- Retry with backoff
- Sync activity logs
- Environment configuration
- Feature-setting file

DESIGN RULE A temporary internet failure should not stop registration, attendance, local administration or an active LAN examination.

Clear entry points for every user

Consistent navigation, meaningful feedback and role-specific workspaces reduce training time and make the system easier to operate.

Secure sign-in

One branded entry point routes each account to the correct workspace.

- Administrator, staff and student roles
- Protected browser sessions
- School identity at sign-in

Responsive design

Controls remain usable across desktops, laptops, tablets and phones.

- Grouped desktop navigation
- Left drawer on small screens
- Search only where useful

Helpful feedback

Users can see whether an operation is waiting, successful or needs attention.

- Loading and empty states
- Validation and error messages
- Reconnect status

Dashboards that turn records into action

The command centre combines operational metrics, recent work and shortcuts while staff and students receive focused dashboards.

QUICK WORK

What would you like to do?

Post an assignment

Grade submissions

Administrator

Leadership receives school-wide visibility and configuration access.

Student, staff and class totals

Assessment indicators

Operational shortcuts

Staff

Teachers see the work allowed by their permissions and assignments.

Assigned classes and subjects

Attendance and grading queues

CBT, assignments and library

Student

Learners access only their own academic workspace.

Scheduled assessments

Materials and submissions

Results and reports

Registration and identity management

Registration creates the learner's authoritative identity and supports later corrections through a dedicated edit page.

Admission record

Capture the information needed to identify and place a learner.

- Admission number
- Registration number
- Full name and gender
- Date of birth
- Calculated age
- Current class

Profile photograph

Record a clear learner image during registration or update it later.

- Webcam capture
- Image-file upload
- Preview before saving
- Supported-file validation
- Private media route
- Report-card reuse

Account administration

Manage learner access without changing unrelated academic records.

- Active or disabled state
- Student login account
- Credential reset
- Last-login visibility
- Audit of sensitive actions
- Scoped student portal

DEDICATED PAGES

View and Edit actions open a complete student page instead of a small dialog, preserving context and improving mobile usability.

Profile, safeguarding and performance

Tabbed student profiles bring contact, guardian, health and academic information together for authorized staff.

Profile and contacts

Maintain current personal and communication information.

- Home address
- Student email and phone
- Guardian names
- Guardian phone and email
- Emergency relationship
- Emergency contact number

Medical and wellbeing

Give permitted staff essential context without exposing it broadly.

- Medical conditions
- Allergy information
- Medication notes
- Emergency guidance
- Restricted visibility
- Change history

Performance and activities

Present learning trends together with wider development.

- Subject performance charts
- Term and session totals
- Cumulative averages
- Affective ratings
- Psychomotor ratings
- Sports and extra activities

PRACTICAL BENEFIT

Teachers and administrators can understand a learner's academic history and support needs from one permission-controlled profile.

Profiles, responsibilities and account control

Staff records connect employment information with the roles, classes and subjects the person is expected to manage.

Staff profile

Store the information needed for school administration and teaching allocation.

- Name and contact details
- Qualifications
- Specializations
- Employment status
- Salary or payroll status
- Profile photograph

Role administration

Assign a role and the granular permissions needed for the person's duties.

- Super Admin role
- Teacher or staff role
- Class management
- Course management
- Attendance and grading
- Configuration restrictions

Account actions

Manage access through explicit buttons and forms rather than browser prompts.

- Create staff account
- Enable or disable account
- Reset credentials
- Review last login
- Inspect access logs
- Record administrative changes

SYNCHRONIZED RESPONSIBILITY

Teacher assignments created from Staff & Roles are reflected on the Class page and use the same assignment records.

RBAC and teaching-assignment boundaries

Authorization is enforced in the server routes as well as the interface, preventing direct API calls from bypassing visible restrictions.

Super Administrator

Full system privileges support configuration, oversight and controlled intervention.

- Users and roles
- Academic configuration
- Financial records
- Feature switches
- Audit activity
- System operations

Class teacher

A teacher with class-management responsibility works only within the assigned class.

- Class roster
- Attendance approval
- Student ratings
- Class comments
- Assigned reports
- Class resources

Course teacher

A subject teacher manages the assigned course for the relevant class even without class-teacher status.

- Course assessments
- Subject grading
- CBT class selection
- Course assignments
- Relevant library materials
- No unrelated subjects

SERVER ENFORCEMENT

List, view, create, update, delete, import, grading and report endpoints all apply the authenticated user's effective scope.

Sessions, terms, classes, subjects and courses

Academic Setup provides the shared structure used by attendance, assessment, reporting and promotion.

Calendar structure

Define the periods in which activity and results are recorded.

- Academic sessions
- First, second and third terms
- Start and end dates
- Active session
- Active term
- Next-term resumption date

Teaching structure

Connect students, teachers and subjects through explicit academic records.

- Create and edit classes
- Create and edit subjects
- Course offerings by class
- Assign class teachers
- Assign course teachers
- Display responsible teacher

Evaluation structure

Set consistent rules for grades, calculations and advancement.

- Grade boundaries
- Grade remarks
- Default passing mark
- Course rubric weights
- Core-subject thresholds
- Promotion average

IN-PRODUCT DEFINITIONS

Configuration explains Course, Subject, Class, Session and Term so administrators use each record consistently.

Activated marking, review and approval

Attendance follows a traceable workflow from teacher activation to final approval, with summaries ready for term reporting.

Activate a register

An authorized teacher opens attendance for a defined class, date and active period.

- Assignment check
- Class and date selection
- Opening time
- Student self-mark option
- Late-mark policy
- Visible active status

Mark each learner

Every student receives an explicit state and an accountable source.

- Present
- Absent
- Late
- Excused
- Student or teacher source
- Timestamped entry

Review and approve

The responsible teacher corrects mistakes before finalizing the register.

- Roster review
- Amendment with audit detail
- Teacher approval
- Daily summary
- Term totals
- CSV attendance import

REPORT CONNECTION Approved days open, present and absent feed report-card attendance summaries and administrative dashboards.

Affective and psychomotor ratings

Configurable rating scales capture behaviour, practical ability and participation for a term or complete academic session.

Affective domain

Record observable attitudes and interpersonal conduct.

- Honesty
- Neatness
- Attentiveness
- Punctuality
- Obedience
- Self-control

Psychomotor domain

Record practical, creative and physical development.

- Handling tools
- Drawing and painting
- Handwriting
- Public speaking
- Sports and games
- Practical coordination

Flexible evaluation

Schools can adapt traits and rating meanings to the selected report-card template.

- Term or session scope
- Configurable rating scale
- Teacher comments
- Cumulative activity view
- Bulk class entry
- Report-card inclusion

WHOLE-CHILD REPORTING

Academic results remain central while approved conduct, activity and attendance evidence provide a more complete progress picture.

Create examinations within teaching scope

Teachers can build tests only for assigned subjects and relevant classes, while administrators retain school-wide oversight.

The screenshot shows a 'Create examination' modal window in the Schoolhouse application. The form is titled 'New CBT test' and includes the following fields and options:

- Test title:** A text input field.
- Class:** A dropdown menu labeled 'Select assigned class'.
- Subject:** A dropdown menu labeled 'Choose a class first'.
- Academic term:** A dropdown menu labeled 'Select term'.
- Overall-grade component:** A dropdown menu with 'Final exam / CBT' selected.
- Duration in minutes:** A text input field with '30' entered.
- Opens (your local time):** A date and time picker showing 'dd/mm/yyyy --:--'.
- Closes (your local time):** A date and time picker showing 'dd/mm/yyyy --:--'.
- Timed test:** A checked checkbox.
- Auto-submit when time expires:** A checked checkbox.
- Student instructions:** A large text area for entering instructions.
- Question 1:** A section for adding the first question, with a 'Question text' label.

Test settings

Define when, where and how the assessment is delivered.

- Timed or untimed
- Release schedule
- Auto-submit at expiry

Question formats

Combine objective and teacher-marked items in one assessment.

- Multiple choice and true/false
- Short-answer questions
- Essay questions

Controlled audience

Class choices derive from the teacher's actual subject assignment.

- Assigned subject scope
- Relevant class scope
- Draft and publish states

Resilient delivery and live monitoring

The exam engine protects candidate work, enforces time and gives authorized staff a real-time view of an active sitting.

Candidate experience

A focused exam interface presents authorized questions and timing information.

- Secure attempt start
- Randomized question order
- Randomized option order
- Question navigation
- Fullscreen kiosk behaviour
- Window-blur incidents

Autosave and recovery

Answers are cached frequently and finalized into authoritative SQL records.

- Autosave every five seconds
- Redis low-latency cache
- Durable response storage
- Controlled attempt resume
- Timer auto-submit
- Duplicate submission protection

Monitoring and grading

Socket.IO events support invigilation while the server controls scoring.

- Connected candidates
- Progress and remaining time
- Incident visibility
- Authoritative CBT options
- Automatic objective grading
- Controlled result release

EXAM INTEGRITY The client never decides the correct answer or final score; authoritative options and grading rules remain on the server.

Coursework from publication to feedback

The assignment workflow connects teacher instructions, student submissions and teacher marking to the correct course and academic period.

Assignment setup

Create structured coursework for an assigned class or subject.

- Title and instructions
- Learning objective
- File attachments
- Release date
- Due date
- Maximum score

Student submission

Learners submit from their personal portal with clear status information.

- Validated file upload
- Submission timestamp
- Late indicator
- Resubmission policy
- Personal submission history
- Receipt status

Teacher grading

Authorized teachers review work and return meaningful feedback.

- Submission queue
- Score entry
- Written feedback
- Return for correction
- Finalized grade
- Audit of changes

ACADEMIC LINK

Assignment scores can contribute to the course rubric and remain associated with the correct student, term, session, class and subject.

Rubrics, results and overall grading

Configurable rubrics combine continuous assessment, assignments and examinations into a transparent final score.

Course rubric

Administrators define component names and weights that total 100 percent.

- First assessment
- Second assessment
- Assignments
- Practical work
- Final examination or CBT
- Weight validation

Result management

Teachers enter or import scores only for assigned courses.

- Manual score entry
- CSV result import
- Maximum-score validation
- Draft and finalized states
- Teacher remarks
- Publishing control

Grade correctness

Final calculations preserve period history and explain each total.

- Weighted component calculation
- Grade boundary lookup
- Subject position
- Class average
- Protected grade history
- Overall aggregate

ILLUSTRATIVE RUBRIC First Assessment 15% + Second Assessment 15% + Assignments 10% + Final Examination or CBT 60% = 100%.

Generate one report or a complete class

Administrators select the desired template and create an individual report or every report for a selected class.

The screenshot displays the 'Report cards' section of the 'Bishop Phillips' workspace. The sidebar on the left contains various school administration and reporting tools. The main content area features a search bar for students, buttons to generate individual or whole-class reports, and a list of students with links to select terms and templates. The interface is clean and modern, with a light gray background and blue accents.

Flexible generation

Choose the learner, class, term, session and approved template.

- Individual PDF
- Whole-class batch
- Term and session reports

School identity

Print output uses configured branding and authorized signatures.

- Logo and watermark
- Student photograph
- Teacher and principal blocks

Complete evidence

Reports combine academic, attendance and development information.

- Scores and grade analysis
- Comments and attendance
- Conduct and activity ratings

Calculations and adaptable report templates

The report service converts approved school records into clear, printable documents inspired by the school's chosen format.

Academic summary

Calculate and display the measures needed to interpret performance.

- Total obtainable
- Total obtained
- Percentage
- Grade and remark
- Subject position
- Class average

Report presentation

Templates control layout without changing underlying academic truth.

- Mid-term format
- Term performance report
- Session report
- Progress report
- Dynamic grading key
- Print and PDF export

Approvals and identity

Configured assets and comments complete the official document.

- School logo
- Watermark
- Student photograph
- Class-teacher comment
- Principal comment
- Signature blocks

PRINT RELIABILITY Images use embedded or network-safe sources so logos, photographs and signatures remain visible from LAN devices and in generated PDFs.

Progress reports and automated promotion

End-of-term and end-of-session workflows help leadership review performance consistently and move learners only after approval.

Progress reporting

Summarize current attainment before the final session report.

- Assessment totals
- Attendance-to-date
- Development ratings
- Teacher observation
- Areas for improvement
- Printable progress form

Promotion criteria

Administrators define the conditions used to evaluate advancement.

- Minimum overall average
- Mandatory core subjects
- Core-subject pass threshold
- Missing-result handling
- Exceptional review flag
- Next-class mapping

Batch promotion

Evaluate an entire class and retain a reviewable decision record.

- Qualified learners
- Repeat candidates
- Manual review queue
- Preview before application
- Approved batch movement
- Historical promotion record

ADMINISTRATIVE CONTROL

Automated evaluation proposes outcomes; an authorized administrator reviews and applies the final promotion batch.

Relevant resources with controlled viewing

Materials are searchable and permission-aware, helping teachers and students find useful content without exposing unrelated resources.

The screenshot shows a web application interface for 'Bishop Phillips'. The left sidebar contains a navigation menu with sections: SCHOOL ADMINISTRATION (HOME, Overview), PEOPLE (Classes, Students, Staff & roles, Hostels), TEACHING (Academic setup, Library, Assignments, Assignment grading, Overall grading, Student ratings, Attendance), and ASSESSMENT (CBT Tests, Live monitor, Results). The bottom of the sidebar shows the user 'System Administrator' with an 'Exit' button. The main content area is titled 'Workspace / Library' and shows a 'Library' section under 'SCHOOL OPERATIONS'. It includes a search bar, an 'Upload material' button, and a 'Refresh' button. A resource titled 'Floor Plan' is displayed, categorized under 'Surveying'. The resource details include the filename 'asasasdsda', the uploader 'By Ethan Groups - JSS1 - English Language15860 THOMPSON RD MILTON, GA 30004 - Asbuilt plan.pdf - uploaded by Staff Member', and a 'View PDF' button.

Resource catalogue

Each upload contains enough context for filtering and discovery.

- PDF, image and text files
- Title and description
- Subject and class metadata

Teaching relevance

Teacher visibility follows ownership and current assignments.

- Personally uploaded materials
- Assigned-class resources
- Exact subject-and-class resources

Protected access

Authorized routes support in-app reading with reduced casual extraction.

- In-app PDF viewer
- No normal download button
- Protective access headers

Individual and bulk Email and SMS

Communication tools use existing student and guardian contacts while recording delivery activity and respecting configured preferences.

Audience selection

Send to one recipient or a controlled school audience.

- Individual student
- Individual guardian
- Selected class
- Selected student list
- All guardians
- Staff recipients

Message delivery

Connect approved email and SMS providers through protected server services.

- Reusable composition form
- Email subject and body
- SMS-length awareness
- Queued bulk sending
- Provider response capture
- Retryable failures

Privacy and audit

Minimize exposed contact data and retain a useful operational history.

- Masked destinations
- Preference checks
- Authorized sender roles
- Delivery status
- Failure reason
- Message activity log

EXTERNAL COSTS SMS, email-provider and related connected-service charges are stated separately in the implementation or renewal proposal.

Hostel and payment management

Schools can enable boarding and financial modules when required, keeping them hidden and inactive for installations that do not purchase them.

Hostel structure

Model boarding capacity from hostel to individual bed.

- Hostel buildings
- Rooms
- Beds
- Gender or category rules
- Capacity limits
- Occupancy status

Student allocation

Maintain a traceable record of boarding placement and movement.

- Assign student to bed
- Allocation date
- Move between rooms
- Release allocation
- Occupancy history
- Authorized hostel roles

Payments and finance

Record relevant financial activity under restricted privileges.

- Student-linked payments
- Reference and amount
- Payment status
- Searchable history
- Financial audit context
- Cloud-sync eligibility

FEATURE CONTROL Configuration and environment settings remove disabled modules from navigation, endpoints and background jobs.

CSV imports, search and efficient lists

Bulk tools accelerate migration and routine updates while validation, pagination and focused controls keep large datasets manageable.

CSV import centre

Provide guided imports for the school's common datasets.

- Students
- Staff
- Attendance sheets
- Subject results
- Overall results
- Downloadable templates

Validation and review

Show errors clearly before records become authoritative.

- Column-header validation
- Data-type validation
- Preview before import
- Row-level error messages
- Duplicate protection
- Processing summary

Productive lists

Responsive pages remain fast as enrolment and history grow.

- Compact search bars
- Search only where applicable
- Relevant filters
- Server-side pagination
- Efficient aggregated queries
- Loading and error feedback

RECOVERABLE IMPORTS A failed row is identified precisely, valid work remains understandable, and staff receive a clear correction path.

Branding, defaults and feature configuration

A governed configuration page centralizes the school identity, academic defaults, regional settings and enabled modules.

www.techninvasion.com.ng

PAGE 26

Protection across identity, APIs and files

Security checks operate at the server boundary so hidden buttons or modified browser requests cannot bypass authorization.

Identity and sessions

Protect accounts and authenticated browser activity.

- Strong password hashing
- HttpOnly session cookies
- CSRF protection
- Credential reset controls
- Login throttling
- Access audit trail

Validation and authorization

Reject malformed or unauthorized requests before business logic changes data.

- Schema validation
- Role permissions
- Class and course scope
- CORS and trusted origins
- Feature gates
- Administrative audit events

Files and infrastructure

Control uploaded content, secrets and recovery resources.

- File-signature inspection
- Protected media routes
- Environment secrets
- PostgreSQL backups
- Upload backups
- Service health checks

SECURITY SCOPE Every administrative list, view, create, update, delete, import, grading and report endpoint applies permission and assignment checks.

Deployment, onboarding and continuity

Glare Technologies configures the installation around the school's structure, validates critical workflows and supports operational handover.

Deployment preparation

Confirm the local server, network and enabled service requirements.

- Server readiness
- PostgreSQL and Redis
- Docker Compose
- Environment variables
- LAN and firewall review
- Backup location

Onboarding and verification

Load school structure and rehearse the workflows each role will use.

- Branding and signatures
- Sessions, terms and classes
- Staff roles and assignments
- Student and history imports
- CBT rehearsal
- Report-card rehearsal

Operational continuity

Document startup, monitoring, backup and restoration procedures.

- Startup scripts
- Health checks
- Database backup
- Upload backup
- Restore verification
- Administrator training

DELIVERY SCOPE Migration depth, hardware, training, support, external providers and custom work are confirmed in the final proposal.

Offline plans: one-time payment

Basic, Standard and Premium operate on the school's local server. The software price is paid once and does not carry an annual product renewal.

Basic

N200,000

OFFLINE | ONE-TIME PAYMENT

Core digital administration for schools replacing paper and disconnected registration records.

- Student registration and editing
- Staff accounts and controlled access
- Class creation and class management
- Limited branding and configuration
- Local browser access on the LAN
- Up to three installment payments

Standard

N500,000

OFFLINE | ONE-TIME PAYMENT

Academic and teaching workflows for structured daily school operations.

- Everything included in Basic
- Academic setup and grading rules
- Attendance and development ratings
- Assignments and digital library
- Student, staff, attendance and result CSV imports
- Up to three installment payments

Premium

N1,200,000

OFFLINE | ONE-TIME PAYMENT

Complete offline capability for CBT, reporting, progression and optional services.

- Everything included in Standard
- CBT delivery and live monitoring
- Overall grading and report cards
- Progress reports and promotion
- Hostel and payment modules
- Up to three installment payments

Cloud Hybrid and Custom plans

Connected services carry continuing infrastructure and support requirements. A scoped quotation confirms the exact users, modules and integrations.

Cloud (Hybrid)

Custom Quote

RENEWED ANNUALLY OR BI-ANNUALLY

Premium local operation with approved connected services for remote reach, synchronization and communication.

- Everything included in Premium
- Background cloud synchronization
- Approved remote access and QR onboarding
- Email and SMS provider integrations
- Connected-service monitoring
- Annual or bi-annual renewal
- Up to three installment payments

Custom

Custom Quote

OFFLINE OR HYBRID DEPLOYMENT

A tailored package for schools requiring selected modules, specialized reports or approved external systems.

- Selected SchoolHouse modules
- Custom forms, reports and workflows
- Approved third-party integrations
- Data migration and staff training
- Tailored rollout and support plan
- Offline or hybrid architecture
- Up to three installment payments

Hardware, messaging-provider fees, cloud infrastructure, migration, support and custom work are itemized in the final proposal.

Core administration and academics

The first comparison covers the records and teaching workflows that form the everyday operational foundation.

CAPABILITY	BASIC	STANDARD	PREMIUM	CLOUD	CUSTOM
Student registration and profiles	YES	YES	YES	YES	SELECT
Staff access and class management	YES	YES	YES	YES	SELECT
Branding and configuration	LIMITED	YES	YES	YES	SELECT
Academic setup and grading rules	-	YES	YES	YES	SELECT
Attendance and development ratings	-	YES	YES	YES	SELECT
Assignments and digital library	-	YES	YES	YES	SELECT
Student, staff and result CSV imports	-	YES	YES	YES	SELECT
Search, pagination and feedback	LIMITED	YES	YES	YES	SELECT
Class and course teacher scope	LIMITED	YES	YES	YES	SELECT
Access logs and account controls	YES	YES	YES	YES	SELECT
School branding on reports	LIMITED	YES	YES	YES	SELECT

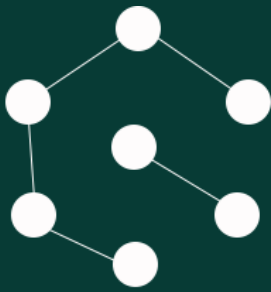

YES is included in the standard tier. SELECT means the capability may be included in the agreed Custom scope.

Assessment, reporting and connected services

The second comparison covers advanced evaluation, optional operations and hybrid connectivity.

CAPABILITY	BASIC	STANDARD	PREMIUM	CLOUD	CUSTOM
CBT creation and exam delivery	-	-	YES	YES	SELECT
CBT autosave and live monitoring	-	-	YES	YES	SELECT
Overall grading and rubrics	-	-	YES	YES	SELECT
Individual and class report cards	-	-	YES	YES	SELECT
Progress reports and promotion	-	-	YES	YES	SELECT
Hostel and payment modules	-	-	YES	YES	SELECT
Background cloud synchronization	-	-	-	YES	SELECT
Remote access and QR connection	-	-	-	YES	SELECT
Bulk and individual Email and SMS	-	-	-	YES	SELECT
Custom workflows and integrations	-	-	-	-	YES
Annual or bi-annual renewal	-	-	-	YES	AGREED

YES is included in the standard tier. SELECT means the capability may be included in the agreed Custom scope.

PRODUCED BY GLARE TECHNOLOGIES

Glare Technologies

One system for the work your school does every day.

SchoolHouse connects people, learning, assessment and administration on a dependable local foundation, with optional cloud services when the school is ready.

01 CONFIGURE

Branding, academic rules, access roles and enabled modules.

02 ONBOARD

Students, staff, classes, assignments and existing records.

03 OPERATE

Attendance, learning, CBT, grading, reports and services.
